Services

South Africa has a well-developed professional and business services sector, offering customised skills to businesses and individual clients. The role that innovation and technology plays in transforming the services sector has been ever-increasing in recent years.

Within this sector, firms deal with a range of opportunities as well as unique challenges requiring multifaceted advice. Our services extend to auditing, consulting, and legal services, as well as business support and consumer services (financial advisers/tax consultants, hairdressers, auto repairs, plumbers, electricians, garden services and landscaping).

We also advise engineers, quantity surveyors, architects and other consultants on professional indemnity and project insurance.

Based on our expansive client base of organisations providing services to other businesses, our track-record talks to our vast experience in advising in matters such as competition law, Labour law, disputes, professional liability, as well as M&A.
